

## Project Title:

The title of my project is \_\_\_\_\_

(What is your project about?)

## Problem:

\_\_\_\_\_  
\_\_\_\_\_?

(What are you wondering about? What do you want to know?)

## Research:

Research your topic and find out as much information as you can. Read books, search the internet, or watch a video. Write down what you found out below. You should have at least 2 sources.

Page #: \_\_\_\_\_

Title: \_\_\_\_\_

## Hypothesis:

I think \_\_\_\_\_ will happen

because \_\_\_\_\_.

(What do you think will happen during your experiment?)

**Plan:** Plan your experiment. Gather all necessary materials.

## Materials:

1. \_\_\_\_\_

4. \_\_\_\_\_

2. \_\_\_\_\_

5. \_\_\_\_\_

3. \_\_\_\_\_

6. \_\_\_\_\_

## Steps:

First,

\_\_\_\_\_  
\_\_\_\_\_

Next,

\_\_\_\_\_  
\_\_\_\_\_

Then,

\_\_\_\_\_  
\_\_\_\_\_

Last,

\_\_\_\_\_  
\_\_\_\_\_

(Make sure to repeat this process 3 times)

## Journal:

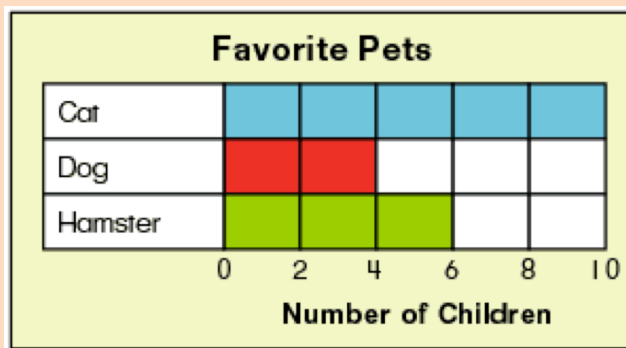

Watch, take pictures, and write down what you see in a journal or notebook. We've attached extra papers in this packet for you to do this.

## Data:

You will also need to create a graph or chart to show the data you've collected.

Here are some examples:

Bar graph

Bar graphs are excellent for illustrating your data.

Table

Favorite Pets		
Pet	Tally Marks	Number
		10
		4
		6

Tables are great for collecting and showing your data.

## Conclusion: Answer your question and draw conclusions.

Was your hypothesis correct? If not, why not?

---

---

What did you learn from your research and from this experiment?
