

The ecosystem I'm going to talk to you about is \_\_\_\_\_.

There are several biotic and abiotic factors that affect this ecosystem and everything in it. First of all, I will mention a few abiotic factors.

<<describe the weather, average temperature and rainfall. Talk about the soil and water>>

---

---

---

---

---

---

Next, I will mention a few organisms from this ecosystem and the role they play (niche).

One of the more famous animals in this ecosystem is the \_\_\_\_\_. It is important to the ecosystem because it \_\_\_\_\_.

Another important animal is \_\_\_\_\_.

<<Continue listing other plants and animals that are important to your ecosystem and any important role they have.>>

---

---

---

---

---

---

Thank you for listening to my presentation. I hope you've learned something about \_\_\_\_\_.
